---

**About the Institution:**
Indian Institute of Plantation Management (IIPM) Bangalore, an autonomous organization of the Ministry of the Commerce and Industry, Government of India, established in 1993, to facilitate management education, training and research & consultancy for plantations and associated agri-business sector. It is co-promoted by the Commodity Boards of India and Agri-Plantation Associations & Industries. IIPM has international educational membership with the Association to Advance Collegiate Schools of Business (AACSB-USA) & the European Foundation for Management Development (EFMD-Brussels) and Permanent Accreditation from Higher Learning Accreditation Commission of Texas (HLACT-USA). IIPM has been recognized by AICTE-MHRD-Govt as a technical institution and its PGDM-ABPM Programme is accredited by National Board of Accreditation (NBA), New Delhi and accorded MBA Equivalency by Association of Indian Universities (AIU) –New Delhi. IIPM is serving as a premier National Institute focusing in the field of commodity plantation & associated agri-business management education.

**About the Seminar:**
The integrity of knowledge that emerges from research is based on individual and collective adherence to core values of objectivity, honesty, openness, fairness, accountability, and stewardship. Integrity in science means that the organizations in which research is conducted encourage those involved to exemplify these values in every step of the research process. Understanding such dynamics that support – or distort – practices that uphold the integrity of research by all participants ensures that the research enterprise advances knowledge. Current trends in research & development in the management education are discovering and enumerating date for emerging issues, especially for agriculture and business management sectors of developing nations due to a primary occupation of agriculture and providing enormous employment and livelihood system. Agricultural research system should link with business and management, later design and develop Innovative business models and strategies for sustainable agriculture to attract the youth to choose agriculture as profession. In India youth population is emerging, and every year lakhs of graduates coming out from the colleges, agriculture and allied sectors will absorb a huge number by applying the innovative models and strategies in the different field of agriculture viz., production, marketing, finance, processing, harvesting, branding, supply chains, operations, AI & ICT etc. Our conference will impact on the society in solving different problems, like food security for the large population, increasing the productivity, reducing the wastage, increasing the farmer’s income, enhancing the employment opportunities through the contributor’s innovative strategies, and identifying disruptive innovations.

---
